## PROFESSIONAL SUMMARY

Senior Ruby on Rails Engineer with 9+ years of experience building, scaling and maintaining production grade SaaS backend. Strong focus on Rails architecture, background processing, APIs, performance, and system reliability in high traffic environments.

## EXPERIENCE

### Independent Rails Consultant, Remote

July 2020 - PRESENT

#### Papershift GmbH, Remote

- Led the redesign and rewrite of a critical Rails backend module that was causing production instability, improving reliability and safely rolling it out to ~200k active users.
- Designed and maintained versioned, backward-compatible REST APIs, collaborating with Vue/React frontend teams
- Implemented and maintained subscription and payment workflows, handling edge cases, failure scenarios and data consistency issues in production SaaS.
- Monitored production systems on AWS and removed unused resources to reduce infrastructure cost.
- Integrated AI-based tooling to support internal data workflows and enhance backend capabilities.
- Reduced memcache usage by 50%

#### Bigfuture, Remote

- Refactoring important modules of the app.
- Implementation new feature using React and backend APIs
- Reducing failure risk by introducing tests to the app.
- Rails upgrade from 6 to 7.2
- Hardened the application against scanner/injection attacks.

#### Unseen IO, Remote

- Led the design and development of API.
- Collaboration with frontend team delivered MVP in 1 month

## SKILLS

Ruby  
Ruby on Rails ( 5.x, 6.x, 7.x )
